Explanation of Abbreviations.

1—Miles. N—North. S—South. E—East. W—West.

* No Town.

The figures before names of towns denote population, either census of 1870, or estimated.

The townships are numbered on the Map. The corresponding numbers designating the names, are found in the first column of figures before list of township names under each County.

The letters and figures following names, refer to that point on the map at which lines drawn from marginal figures top and bottom, and letters upon either side of map, would cross each other at right angles.

For example, to find "*New York City D 5*," let the diagram below represent the map. New York is seen near the crossing of lines D—D and 5—5.
